Self-Regulation

**Attention
Regulation**

Attention Regulation, Children demonstrate the emerging ability to process stimuli, focus and sustain attention, and maintain engagement in accordance with social and cultural contexts.

0-9 months

Children are attempting to process an abundance of new stimuli every day. Children are also building their internal capacity for sustained attention and regulation through interactions with their co-regulating other.

Self-Regulation

Behavior Regulation	Behavior Regulation, Children demonstrate the emerging ability to manage and adjust behaviors in accordance with social and cultural contexts.
7-18 months	The use of social referencing emerges and supports children in developing an internal capacity to modify some of their behaviors. Children still depend heavily on the use of their caregiver to help co-regulate their behaviors.

Self-Regulation

**Behavior
Regulation**

Behavior Regulation, Children demonstrate the emerging ability to manage and adjust behaviors in accordance with social and cultural contexts.

16-24 months

Children may be able to demonstrate limited self-control over behavior by responding to cues found in the environment. Children also begin to use more complex strategies to help manage feelings of impulsivity.

Self-Regulation

Behavior Regulation

Behavior Regulation, Children demonstrate the emerging ability to manage and adjust behaviors in accordance with social and cultural contexts.

21-36 months

Demonstrate limited self-control without intervention, have a range of expected behaviors & can manage some, increased capacity to recognize when they need a caregiver to help regulate instead of relying on their own self-regulation strategies.

Social & Emotional Development

Attachment Relationships

Attachment Relationships, Children form secure attachment relationships with caregivers who are emotionally available, responsive, and consistent in meeting their needs.

21-36 months

Children demonstrate a desire for their attachment figure to share in their feelings, responses, and experiences. Behaviors that demonstrate a need for physical proximity with the primary caregiver decrease, while in certain instances of distress, some children seek to be close to their attachment figure.

Cognitive Development

Symbolic Thought

Symbolic Thought, Children demonstrate the understanding of concepts, experiences, and ideas through symbolic representation.

7-18 months

Children use social interaction to continue to gather meaning from objects, actions, and people. Children move from exploring objects to learning how to play with objects in ways they are intended to be used. Toward the end of this age period, children begin to use one object to represent another object.

Approaches to Learning

Confidence and Risk-Taking

Confidence and Risk-Taking, Children demonstrate a willingness to participate in new experiences and confidently engage in risk-taking.

0-9 months

Children begin to build confidence through the everyday interactions they experience with their caregivers. These interactions form special relationships, which in turn build the “secure base” for children to take risks and try new experiences.

Approaches to Learning

Persistence, Effort & Attentiveness

Persistence, Effort & Attentiveness, Children demonstrate the ability to remain engaged in experiences and develop a sense of purpose and follow-through.

7-18 months

Children begin to become more persistent in interacting with people, exploring objects, and accomplishing tasks. While their ability to sustain attention increases, they are still easily distracted by other objects and events in the environment.

Approaches to Learning

Persistence, Effort & Attentiveness

Persistence, Effort & Attentiveness, Children demonstrate the ability to remain engaged in experiences and develop a sense of purpose and follow-through.

16-24 months

Children increase their ability to remain focused on goal-oriented tasks. At this stage, persistence is evidenced by the process the child engages in to discover how to accomplish the goal, instead of by the end result.
